Portfolio: portfolio.shrikanth.dev | Demo: demo.shrikanth.dev

Professional Summary

Innovative AI Engineer Intern with experience building conversational AI, agentic workflows, RAG systems, and production-ready FastAPI backends. Passionate about LLM application development, prompt engineering, API design, and scalable AI systems.

Technical Skills

Languages: Python, SQL, JavaScript

AI: OpenAI, Gemini, LangChain, LangGraph, Hugging Face, RAG, Prompt Engineering

Backend: FastAPI, Flask, REST APIs, JWT

Database: PostgreSQL, SQLite, ChromaDB

Tools: Docker, Git, GitHub, Postman

Projects

AgentFlow AI Assistant

Designed a multi-agent AI assistant capable of planning tasks, invoking tools, maintaining conversation memory, and generating structured responses. Built modular FastAPI services and integrated LLM APIs. Tech: Python, LangGraph, FastAPI.

DocMind RAG

Built a document intelligence platform supporting PDF ingestion, semantic retrieval, citations, and conversational Q&A; over enterprise documents. Tech: LangChain, ChromaDB, OpenAI.

Prompt Optimizer

Created a prompt analysis dashboard that estimates token usage, detects prompt issues, and recommends improvements for quality and cost optimization. Tech: Python, Streamlit.

Education

Bachelor of Computer Applications (Sample University) — 2025–2028

Certifications

Generative AI Fundamentals • FastAPI • Git & GitHub • Prompt Engineering (Sample)
